

# A Green Path to Student Success

Where scholars Learn. Lead. Succeed.

## WHY PASO VERDE SCHOOL?

Paso Verde has a robust STEAM (Science, Technology, Engineering, Art, and Mathematics) program. We are working to become an International Baccalaureate (IB) school -- focusing on implementing challenging, high-quality educational programs to create inquiring, principled, knowledgeable, and caring scholars by practicing intercultural understanding and respect.

We strive to teach our scholars to use critical and creative-thinking skills to analyze and take responsible action, to nurture curiosity, and to encourage principled, open-minded, and caring, communicators. Our scholars balance risk-taking in their journey to implement new skills while reflecting on what they learned. We offer Spanish, art, science, and math classes to complement our challenging curriculum. After school, we offer coding, Engineering, Chinese language, art, clubs, and sports to help our scholars do their best to learn, lead, and succeed.

Paso Verde is in the process of expanding to a K-8 program, creating a community of parents, teachers, and scholars that will prepare our students to transition to high school and beyond.

## IS PASO VERDE SCHOOL RIGHT FOR MY STUDENT?

Our teachers have many years of experience and collaborate with parents, our Parent Teacher Association (PTA), and Principal to create rigorous lessons and enrichment opportunities that meet Natomas Unified standards and are engaging, fun, and help our scholars learn how to be successful.

Our active PTA sponsors and enhances learning opportunities like our edible school garden, daily walking school bus, art docent programs, thinker lab, and more!
