

### Chapter 11.3 Other Mechanisms of Evolution

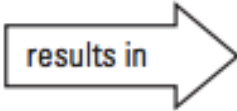

Key Concept: *Natural selection is not the only mechanism through which populations evolve.*

1. **Gene Flow**

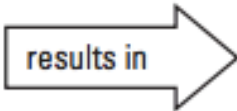

Definition:

How it works:

Lots of gene flow  
between populations

results in 

Limited gene flow  
between populations

results in 

2. **Genetic Drift**

Definition:

How it works:

Key Terms

Bottleneck effect:

Founder effect:

Negative effects:

3. **Sexual Selection**

Definition:

How it works:

Types

Intrasexual:

Intersexual:
