

The Planets of our Solar System

Flip Book

For this project you will make a page for each of the eight planets of our solar system.

For each planet you will find the following information:

- Name (with illustration)
- Mass (kg)
- Gravity
- Number of moons
- Equatorial Diameter
- Polar Diameter
- Orbit distance
- Orbit period
- Surface temperature
- First record
- Discovered by
- 5 facts

On the back page

- Explain the role gravity plays in keeping the solar system together.
- Explain the relationship between mass and gravity.
